

# Simplify your floor care

with UVolve® Instant Floor Coatings

Finding it difficult to fit floor maintenance into your busy schedule?

## Floor care doesn't have to be a hassle.

Maintaining a clean and attractive floor is easier than ever with UVolve® Instant Floor Coatings. With the long-lasting protection of UVolve®, eliminate the frequent floor care such as—top-scrubbing, stripping, sealing, and buffing. People can remain in the area during installation because there is no offensive odor. Plus, cleaning is a breeze because dirt and debris won't easily penetrate UVolve®'s surface.

UVolve® can be applied over terrazzo, vinyl composite tile (VCT), rubber or vinyl sheeting and quarry tile.

UVolve® over terrazzo & vinyl composite tile

### How does UVolve® work?

**Prep:** The floor is stripped to a clean surface so that the coating can be applied

**Coat:** The UVolve® coating is then applied by an approved applicator.

**Cure:** The UV light unit instantly cures the UVolve® coating.

**Ready:** Your floor is all set for immediate use—with its full resistance to chemicals, stains and wear from heavy foot traffic.

### The greener solution

UVolve® is a highly sustainable floor coating solution that is safe for both people and the planet. These solvent-free coatings are non-flammable, with near-zero volatile organic compounds (VOCs) and contain no hazardous air pollutants. A facility pursuing green building certifications should consider UVolve® an excellent choice.

- No solvents
- Non-flammable
- Near-zero VOCs
- No hazardous air pollutants (HAPs)
- No offensive odor

## DSM: Bright Science. Brighter Living™

UVolve® Instant Floor Coatings are products of Royal DSM N.V., a global science-based company active in health, nutrition and materials. DSM is a trusted leader in delivering innovative solutions that nourish, protect and improve performance in global markets such as food and dietary supplements, personal care, feed, pharmaceuticals, medical devices, automotive, paints, electrical and electronics, life protection, alternative energy and bio-based materials.

DSM defines sustainability by meeting the needs of the present generation without compromising the ability of future generations to meet their own needs – which in turn means boosting economic prosperity, environmental quality and social responsibility for the benefit of people, planet and profit.
